Working Capital Funding

Priority Funding can provide finance for working capital requirements.

Some people do not like to use a factoring arrangement, so we have sought an alternative option that will suite many businesses seeking alternative funding lines.

Priority Funding simply provides a **commercial loan secured by equipment or other assets**.

Working capital finance is an attractive **alternative to an overdraft**, as it provides for a known cash flow without the issue of worrying about the overdraft limit.

This type of loan is suitable for **ALL** businesses that have inconsistent cash flows and is useful for businesses going through rapid growth phases.

So if **working capital** is what you require, **give us a call on 07 3420 5703** to discuss your needs.
